

SAFETY STATEMENT

This document sets out the Safety Policy of Keogan Electrical Contractors. So far as is reasonably possible we will ensure that our individual places of work and the materials, equipment, plant and machinery we use are safe and comply with statutory requirements. As and where required, employees will receive the necessary information and training to carry out their tasks correctly and safely. Facilities will be available for Employer-Employee consultation on safety matters and Sub-Contractors will be encouraged and assisted in the area of consultation and training.

While the Health & Safety of the workforce is the responsibility of the Company, it is the duty of all employees to act responsibly and to do everything that is reasonable to prevent injury to themselves, their fellow workers and any person who has occasion to visit the site, including members of the public.

Although Safety Policy is a management responsibility, it needs a team effort to give effect to the Policy. Works Contractors, Sub-Contractors and Self Employed persons must ensure that neither their own or the Health & Safety of others is put at risk by their work activities and they must conform generally with the duties and responsibilities as for employers and employees in the Current Legislation.

Our Safety Policy will be kept up-to-date as the business develops and new changes in legislation and work procedures occur.

Signed : Thomas Keogan

Position: Director
